When your prosperity account has been activated with your new password, please write your recording number down which you will find in your profile.

This recording number will be needed before you can open your vendor account (Prosperity account needs to be active before a vendor account can be opened)

3) Next step only if you wish to set up a vendor account.

a). Click onto the 528 [Global 528 Vendor Prosperity System](#)

b). Follow the same steps to complete the form for the vendor account this is your business name and alias email address you created(joe@use.startmail.com).

Fill this webform just as you did for your previous account, however, GFG Commercial Banking no longer wants people to use their own unincorporated trade name to open an account. They want you to have an unincorporated business name or named shopfront, so - here is a solution if you are currently not a self-employed business-owner:

- c) You can register a domain for very little at: <https://www.namecheap.com/> (around \$25.00 per year) and then use your domain as your business name (e.g. if you are a teacher, for example, you might register the domain name www.pamelathesupertutor.com – in which case your business name becomes: "Pamela the Super tutor").

To operate as "Pamela The Super Tutor" you can use the hosting and website building options at namecheap.com and then set up a free booking calendar account with <https://calendly.com/> that use that in conjunction with your website so that people can book appointments with you.

In general, I think it is a very good idea for as many people as possible to seriously consider becoming self-employed as part of the process of becoming self-governing.
